

DA-12

Hydraulic Low Pressure 4" Cable Cutter

Specifications

Output	6 Ton at 2,500 psi
Weight	31 lbs.
Size	15" x 15" x 17"

Cutting Capacities

Lead Sheath	4"
Comm. Cables	4200 pair

Features

- Operates on 2500 psi
- 4" Jaw Opening
- Safety Trigger

For Use With

Low Pressure Hose	NCH-1038
Couplers	SC-Series

NCH-1038

SC-Series

The **DA-12** hydraulic handheld, cable cutter can be operated directly from the utility line truck. At 2,500 psi pressure, it can cut 4" lead sheath cables as well as 4200 pair communications cables. A 6 ton cutting force is produced at 2,500 psi pressure, less than 2,500 psi will reduce the cutting capacity. It operates on open center trucks and comes with HTMA couplers.

The 4" jaws slice through lead, copper and aluminum cables cleanly and without jamming because of the double-acting system. The DA-12 is portable, with non-slip, knurled handles and a safety ring. It has a positive open and close position and a special built-in safety trigger. It stops when you stop.
