The **REC-3510** is the largest in our line of battery operated 12 ton compression tools. The jaw opening is 1.65" and will accept mid-span copper and aluminum splices and lugs up to 750 MCM Cu/Al. When the sleeves are compressed they can be removed through the large jaw. This tool accepts all "U" type dies available on the market.

A built-in, preset 10,000 psi bypass cartridge will audibly bypass when optimal pressure is achieved. Test dies accompanied with our PG-510 can confirm the output pressure when needed. The output pressure can be adjusted via a bypass port located at the top of the tool. This tool has the most universal range of all our self-contained ROBO*Tools.
